### Skills

Swift iOS SwiftUI Git CI/CD Python Node.js AWS Scrum

## About

I am a person who is always looking for innovation and automating every thing possible. I have experience with projects in the areas of education, streaming and finance. I work with the creation, evolution and improvement of architectures with performance and quality improvement goals.

## Professional Experience

### Itaú, Remote

Senior iOS Developer

March 2022 - current

I am working on the user communication modules, such as push notificacations, communication preferences and the list of all notification the bank send to the user.

iOS Swift Modules

### Meta, Remote

Senior iOS Developer

December 2020 - February 2022 (part time)

I was responsible for defining the project structure with the client (Maple Leaf Sports & Entertainment). Together with an android developer, we structured the technical part of the project. I created the SDK following Clean Arch and MVVM. The biggest challenge of this project was that it wasn't an app, it was an SDK (distributed by Cocoapods) to be integrated with other apps. The project was guided by Agile using Scrum and most meetings were in English.

iOS Swift Github Actions Scrum Pods

### Claro Brasil, São Paulo - SP, Brazil

Senior iOS Developer

March 2019 - March 2022

I worked on streaming projects providing live and VOD content to users. The projects followed the Agile methodology and used SAFe. The main project was Now Online App, I worked there focusing on improving quality and user experience. This work was done through refactoring features and architectural components.

iOS Swift Fastlane Bitrise SAFe

## University of Fortaleza - UNIFOR, Fortaleza - CE, Brazil

iOS Developer

March 2018 - March 2019

I worked as a Tech lead and iOS developer. The main app which I worked was Unifor Mobile, this app is mobile version of the university platform. The app users can be professors, students or employees. The main features were the map, which could guide the user to any main point in the university, the frequency, enabling teachers to make the student frequency in their classes, and enrollment, which allows the students to choose subjects and enroll in the ones they want to. I was responsible for teaching interns about the technology and how the projects work in real world through courses and daily tracking by using scrum. I also contributed to create a set of other apps for the university.

iOS Swift Tech Lead Ruby on Rails

## University of Fortaleza - UNIFOR, Fortaleza - CE, Brazil

Intern - iOS Developer

July 2017 - March 2018

I was iOS developer intern and worked on a refactoring in the main university app. I had experience with several areas, such as iOS development, Android development, Ruby on Rails development and UX.

iOS Swift UX

## Education

### University of Fortaleza - UNIFOR

Graduation, Computing Engineering

2015 - 2019

- Closure Project: Research using recurrent neural networks to predict cryptocurrency trends.
- Activities: Object Orientation Monitor in 2016; Microprocessor Monitor in 2017; Researcher in the area of sensor network security.

## Personal Projects

**iOS Movies:** App integrated with TheMovieDB to be a base project to apply new technologies or create a POC.

iOS Swift Design System MVVM View Code

**iOS Cash Handler:** This project in development creates an app that uses SwiftUI, Clean Arch, coordinator and SPM modules.

iOS Swift Design System MVVM View Code

**iOS Common Module:** A set of extensions for views to improve code readability, write and maintenance about constraints and allowing easy integration with design systems.

iOS Swift Design System View Code

**Home Security System:** System to detect people and objects using IP cameras.

Computer Vision Python Flask WebSocket MongoDB Raspberry Pi

**C.E.I. B3 - Crawler:** Crawler project to extract data from a Brazilian Stock Market platform and give you an overview about your investments by APIs.

Web Scraping NodeJS Python Serverless AWS DynamoDB AWS Lambda

**Mobile Stores (App Store e Play Store) - Crawler:** Crawler to extract reviews from App Store and Play Store.
